

Technical Requirements:

1. I must create exactly 5 Java File: Ant.java, Bird.java, Hippo.java, Vulture.java, and Longhorn.java
 - The file name must be exactly the same
2. Each file must have a complete class
3. Each critter must have one constructor with the parameters given
 - Longhorn cannot have a parameter.
4. Each Critter class must extend from the critters class or the other critters class.
 - You must override the behavioral methods based on the description given by the instructions
5. You must include the strategy behind the longhorn critters class.
 - You must have a creative survival strategy
6. You cannot tell longhorn to reference the class name of the other critter class.
